

Green Team challenge

Wild animals and their habitats are disappearing because of the actions of humans. A Zoo can help to save and protect wildlife.

As you walk around the Zoo today, think about these questions and try to find the answers.

Visit **Gorilla Kingdom** (map ref. F4)

Which gorillas can you see today? Can you name them?

Why are Gorillas **disappearing** from the wild?

Look in the Field Station near the gorilla statues.

Give one thing that we can do to help **save wild gorillas**.

Think of two ways that a **Zoo can help** to protect wild animals.

Visit the **B.U.G.S!** house (map ref. C7)

Look at the variety of animals. All animals are linked in food chains and webs. Every animal is important to our planet as it has its own **job to do or role to play**.

Find 3 animals and write down their job or role. *e.g. spiders help to reduce the number of flies by eating them.*

Animal

Job or role

Now try and make your own food chain with some of the animals you've seen in this building.
