Food & Feeding

We can also group animals based on what they eat.

Herbivores eat plants

Carnivores eat animals

Omnivores eat animals and plants

How many of each type can you find at the zoo?

(My name is: )

Classifying Animals

Today you are going to learn about some of the animal groups in the world and how we classify animals into these groups.

Can you draw your route around the zoo on the map?
Animals that have bones inside their body can be split into five groups.

**Mammals**
- have hair

**Birds**
- have feathers

**Reptiles**
- have dry scales

**Fish**
- have wet scales

**Amphibians**
- have smooth skin

---

Can you find these animals at the zoo? Which animal group do they belong to? Draw an arrow to the correct group.
